

Below are the list of birds so far identified in the sanctuary, some of which were sighted in the unprotected area. Those who have a keen interest in any of the groups listed might find it fun to help with its updating and well as creating a photographic library of what we have here. I'll leave it for you guys to decide what uses you might make of these lists. 6/12/03. Birds list is a mixture of what Robert Payne (undertook original ecological study) saw and suggested what would be here and mine and Nick Carson's observations. Adam Cohen
