

Blade's story

"Mind your own business."

Now he's dead

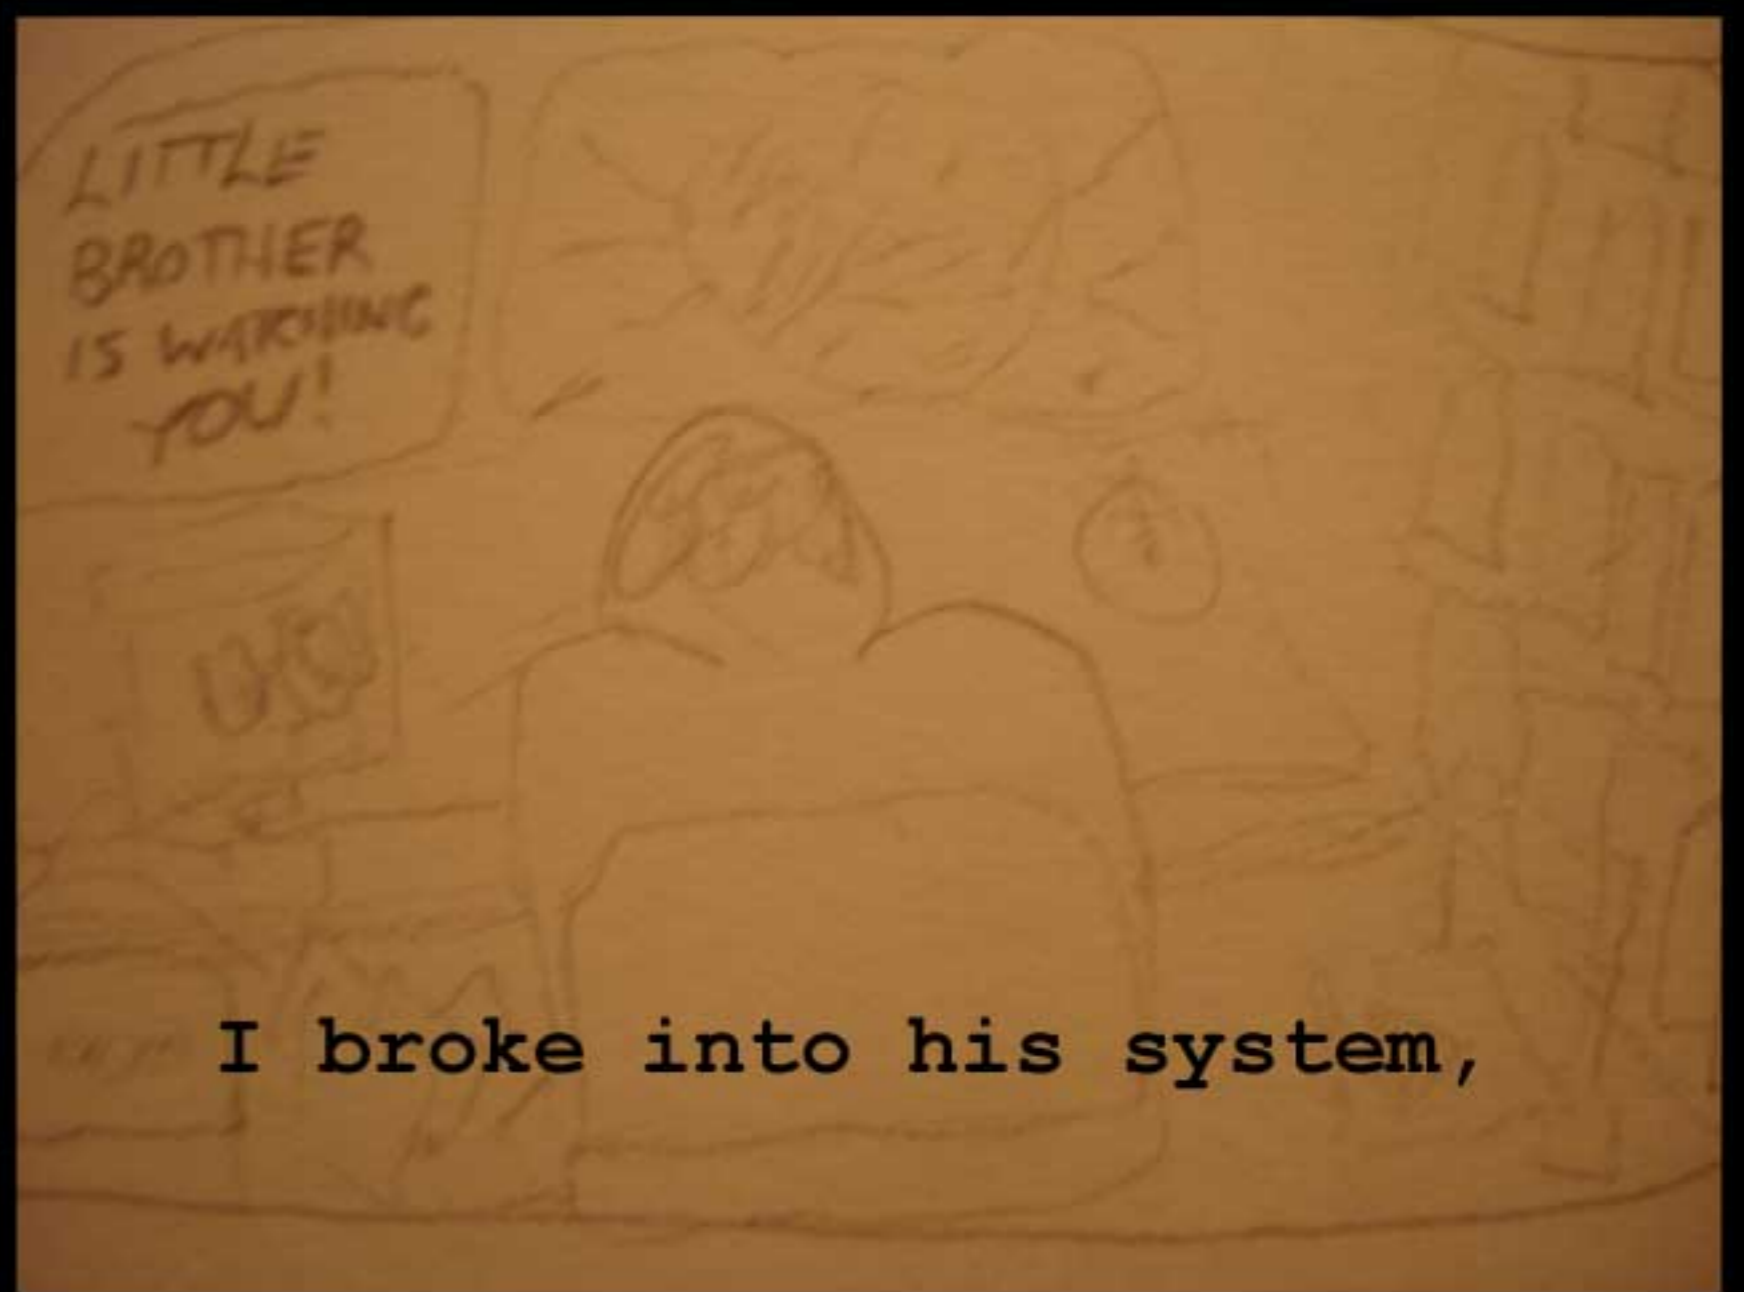

And it's my fault.

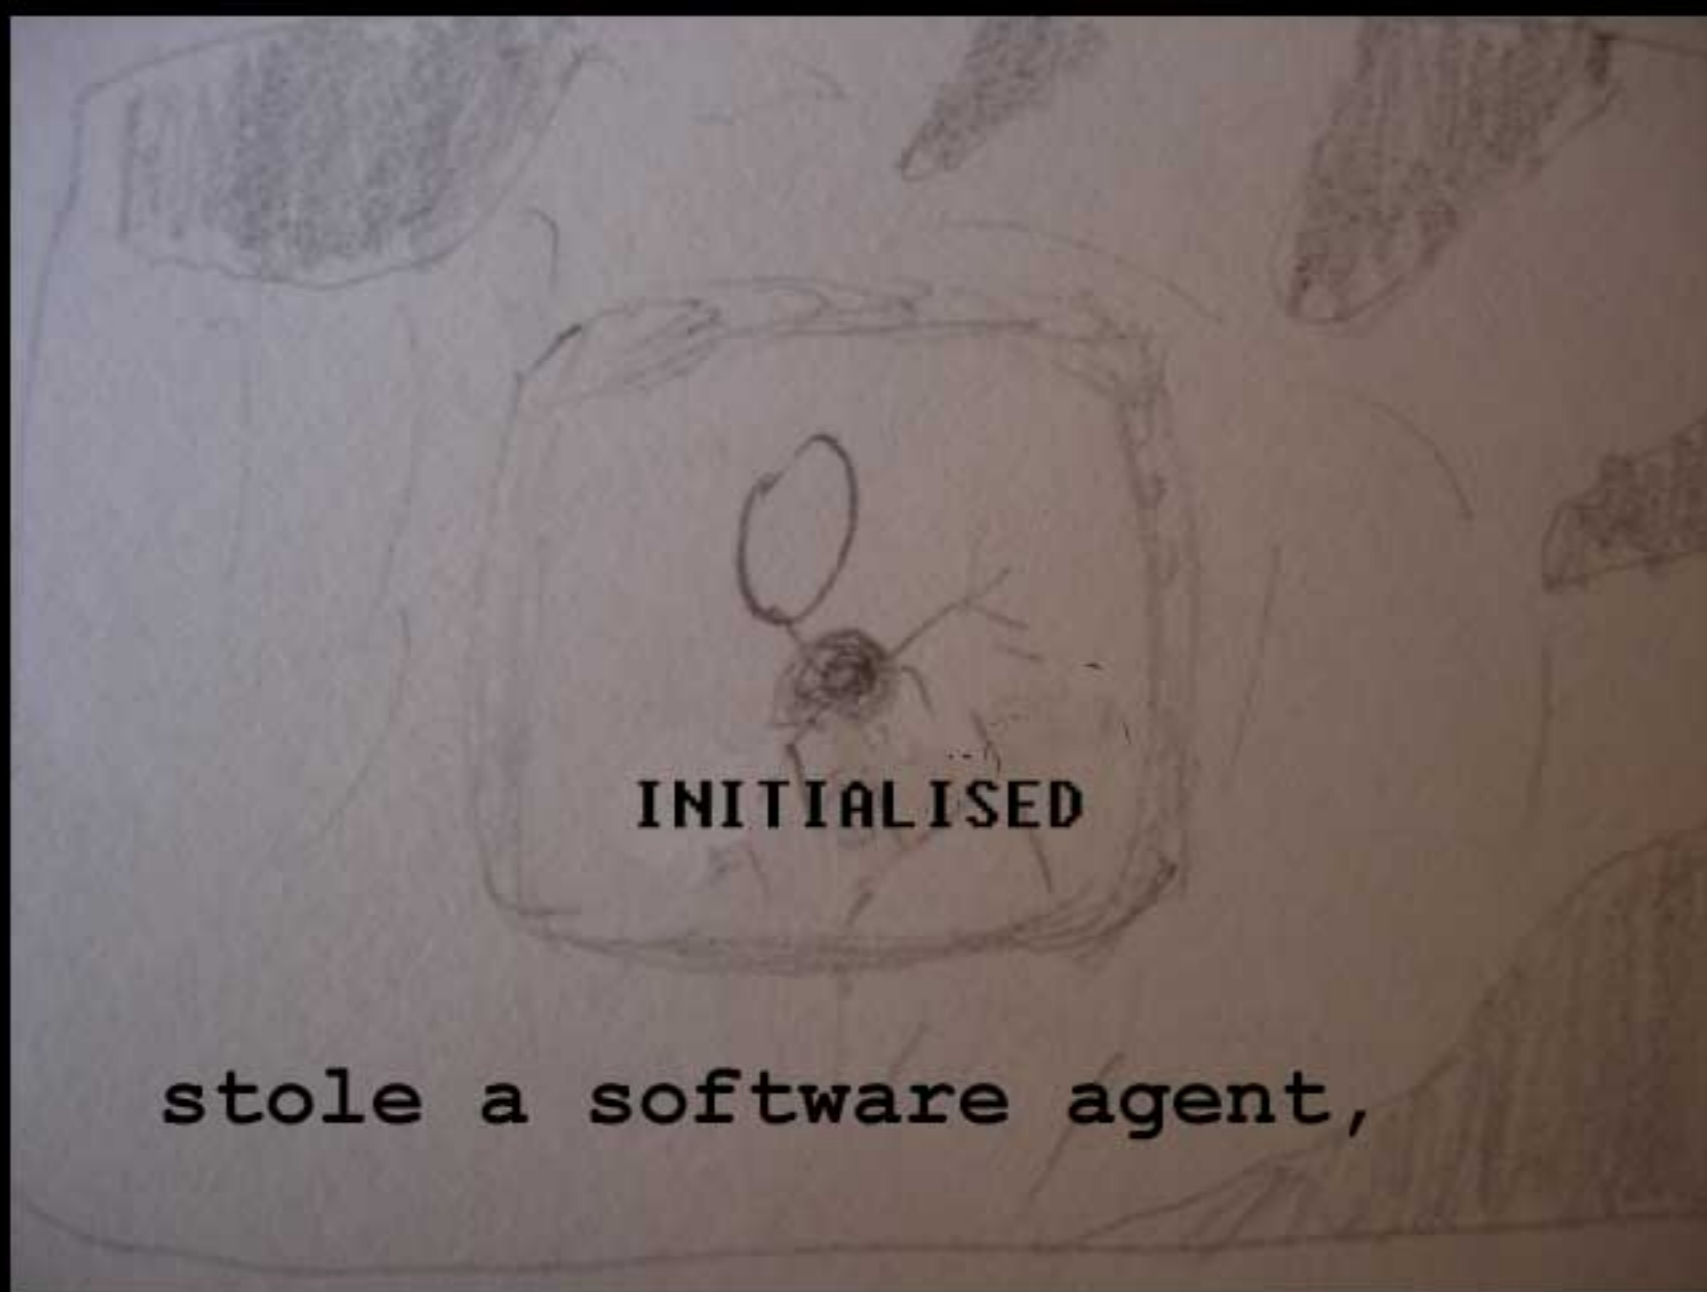

LITTLE BROTHER IS WARNING YOU!

I broke into his system,

and used it to hack into government files.

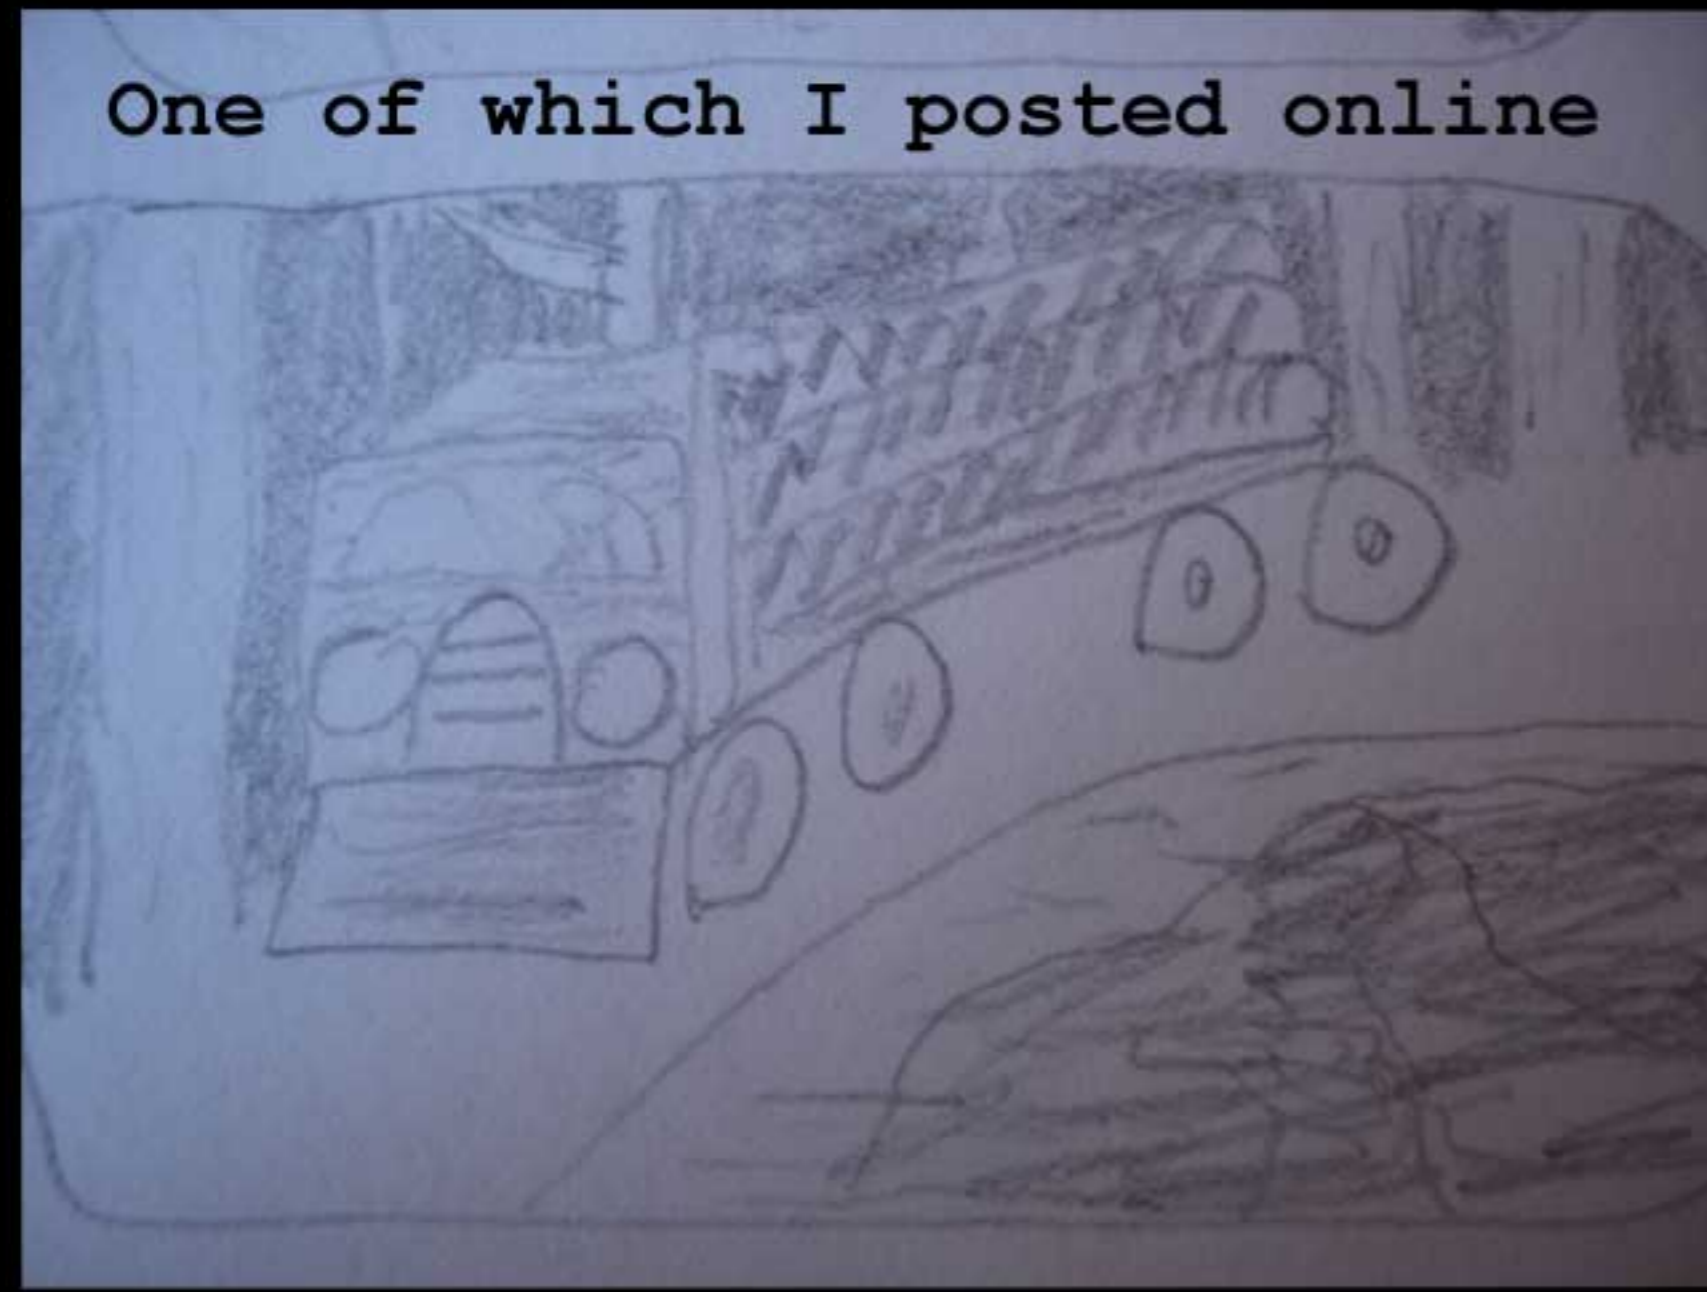

stole a software agent,

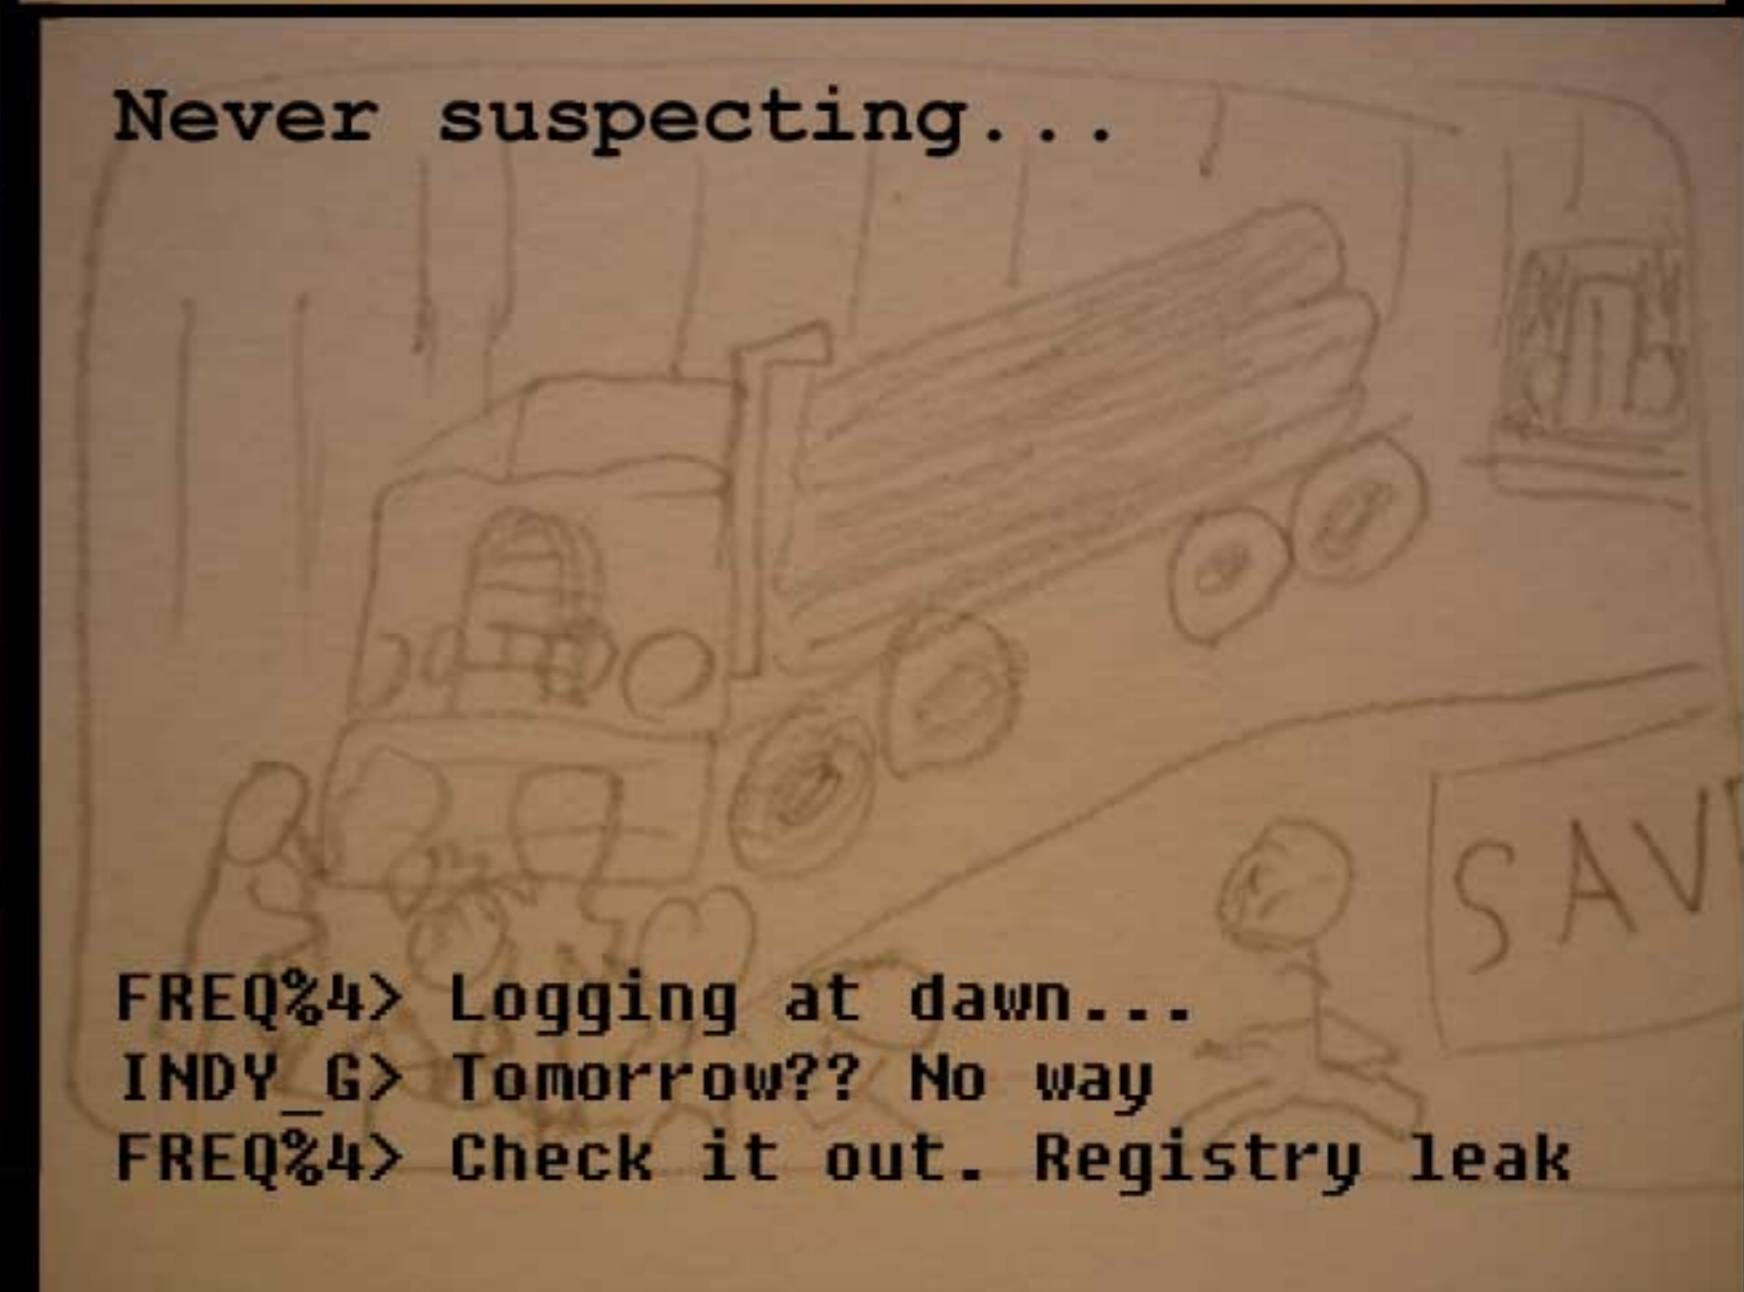

One of which I posted online

OPERATOR PRIVILEGES GRANTED...

Never suspecting...

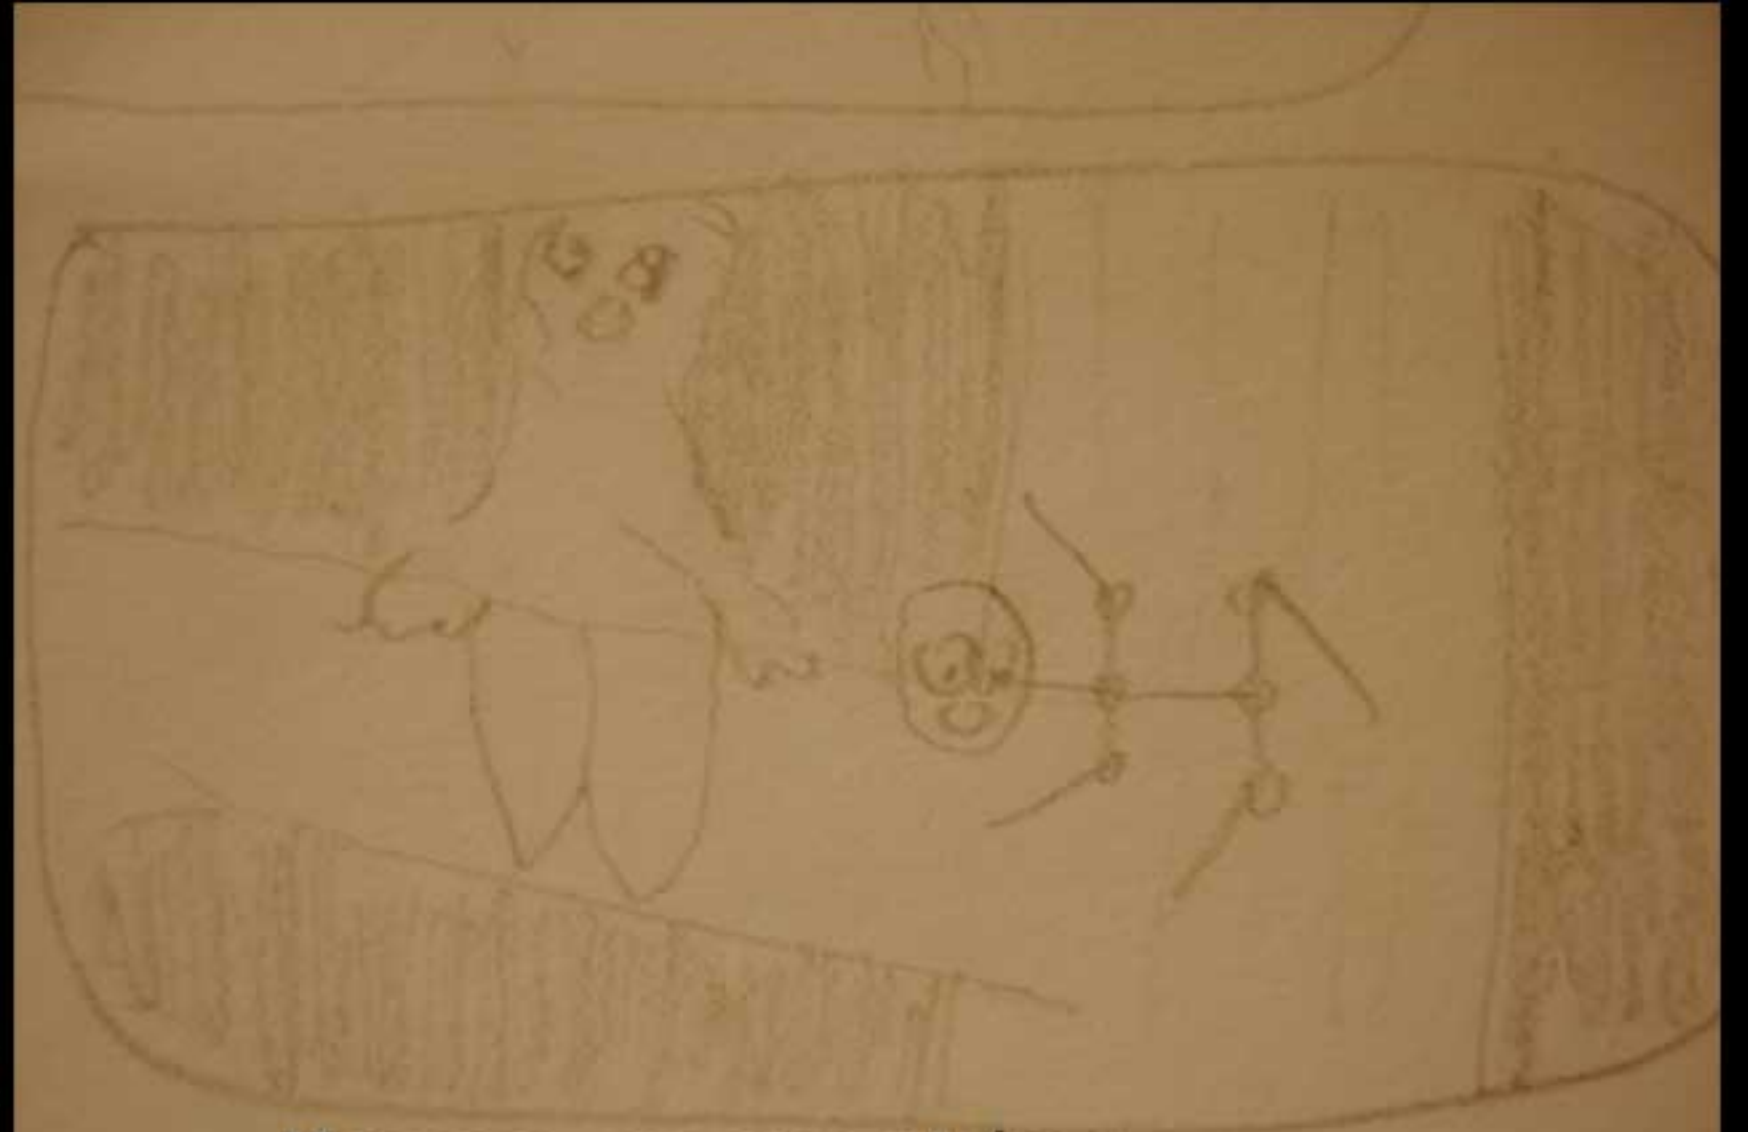

FREQ%4> Logging at dawn...
INDY_G> Tomorrow?? No way
FREQ%4> Check it out. Registry leak

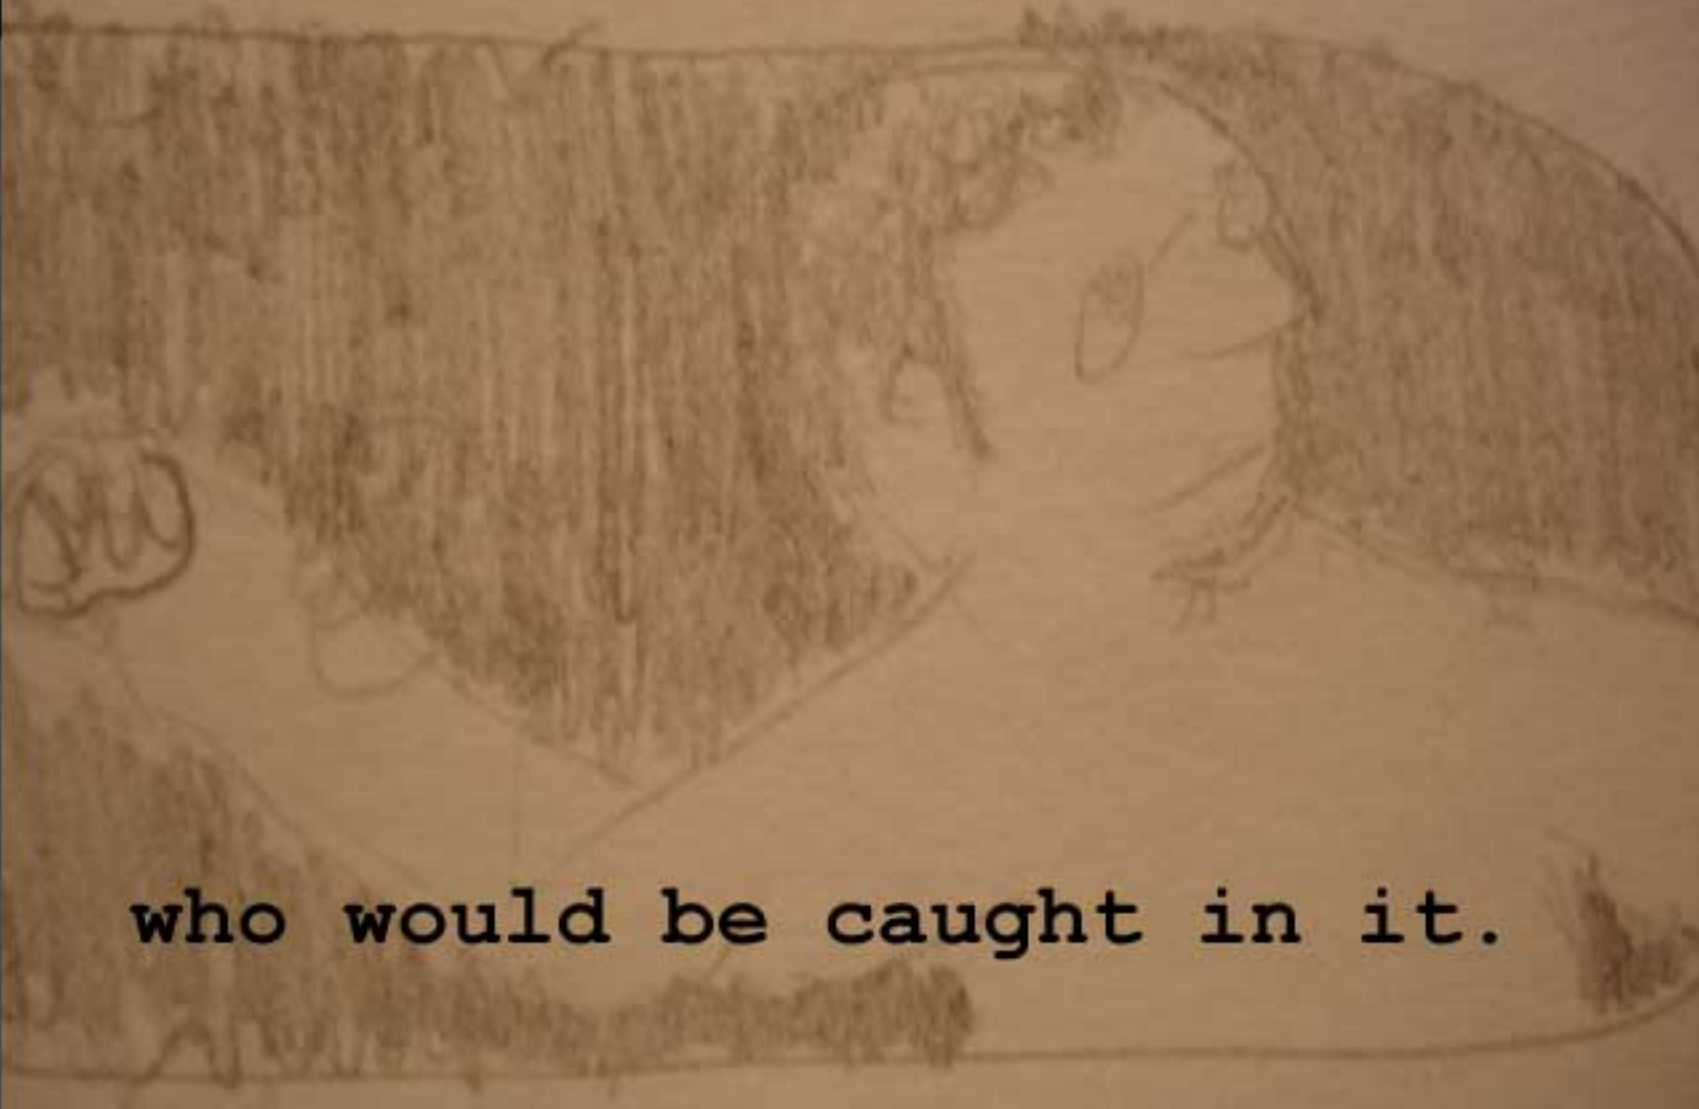

the information inside
was a trap.

Never suspecting...

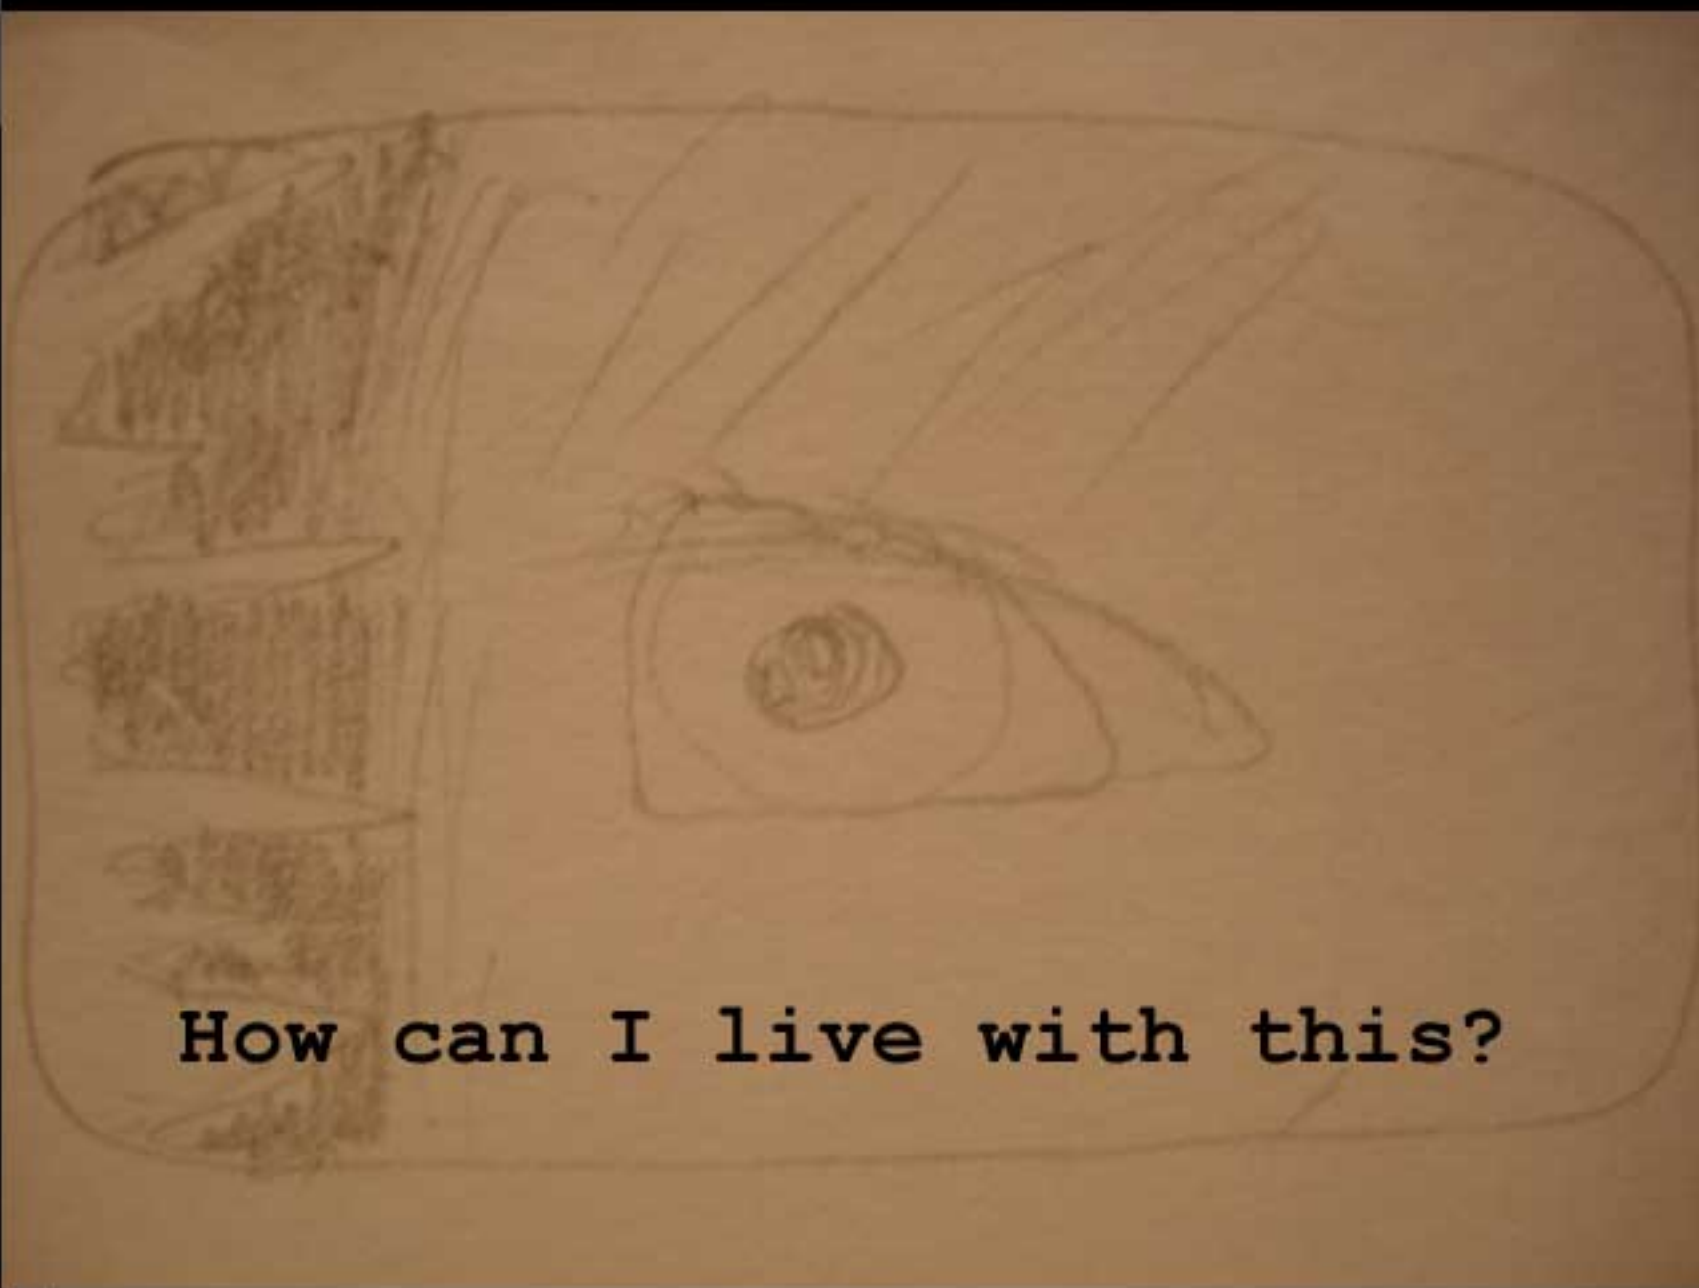

who would be caught in it.

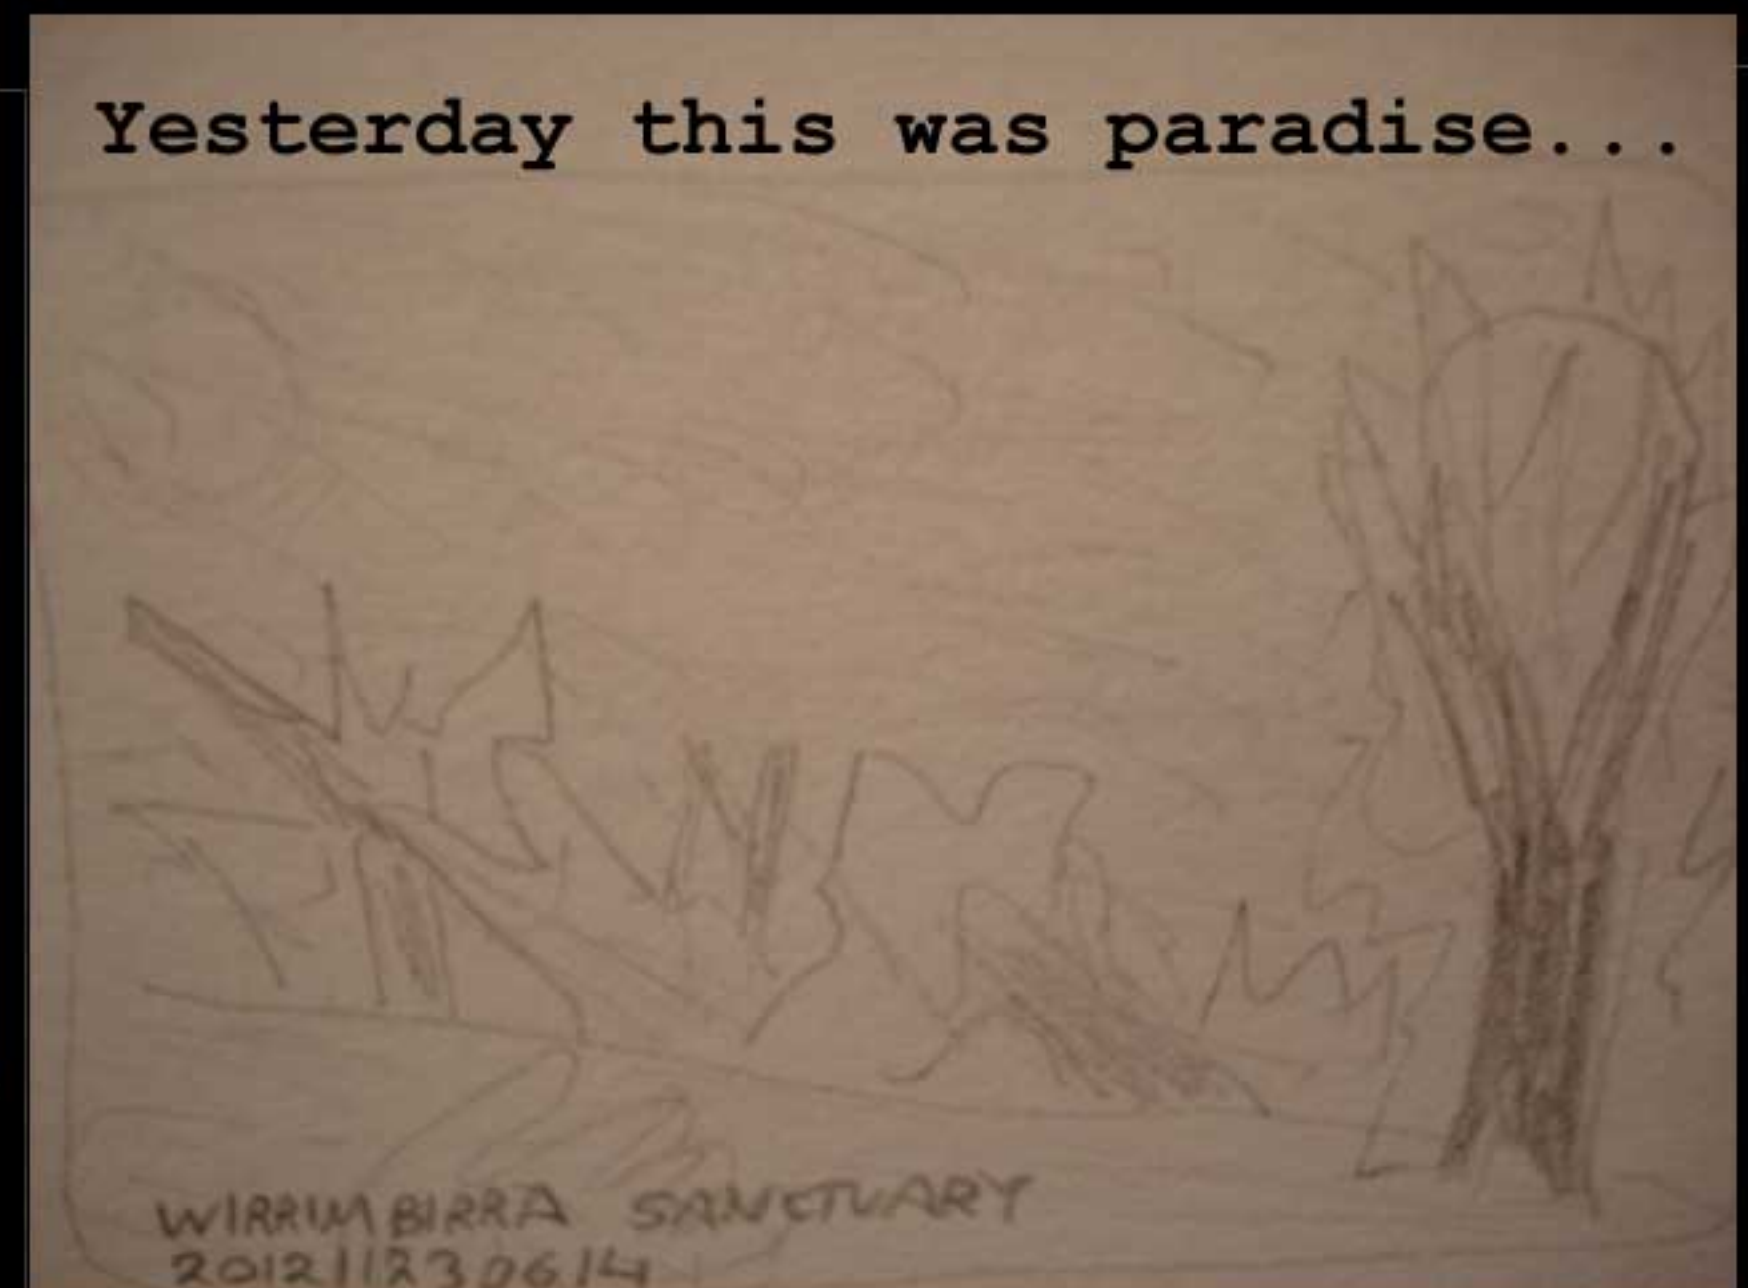

Yesterday this was paradise...

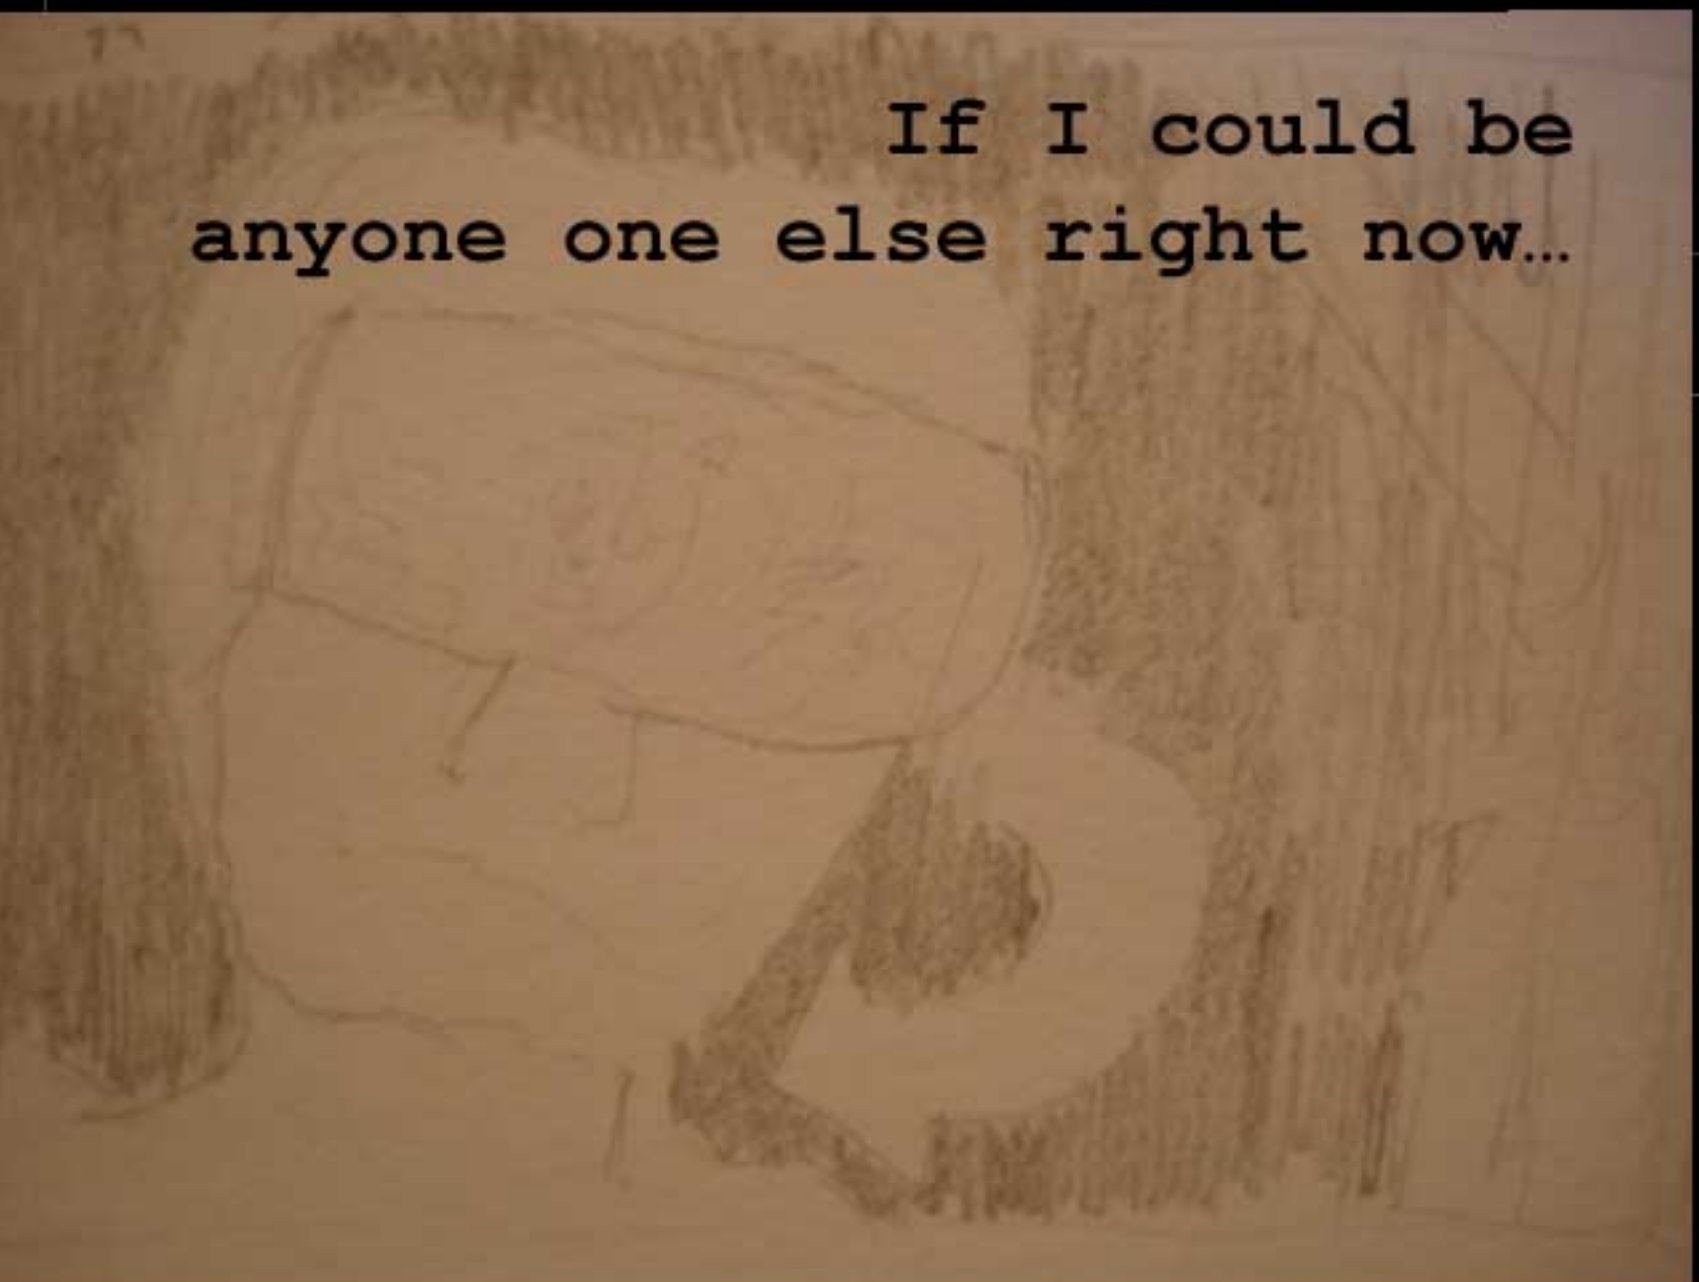

How can I live with this?
